MUNICIPAL ADMINISTRATION & URBAN DEVELOPMENT (A) DEPARTMENT

G.O.Ms.No.96

Dated:23.04.2015

Read the following:

1. A.P Infrastructure Development Enabling Act, 2001.
2. G.O. Ms.No.44, Municipal Administration & Urban Development (A2) Department, Dated: 09.03.2015,

ORDER:

e-Governance is increasingly becoming a good device for speedy and efficient delivery of various Municipal services to the citizens by the Urban Local Bodies viz. Municipal Corporations, Municipalities in the State. e-Suvidha, an e-Governance project is currently being implemented in the ULBs for collection of taxes, issue of Building Permissions, Birth and Death Certificates, etc.

2. In the context of citizen's and Urban Local Bodies requirements in service delivery have increased multifariously, and also rapid advancements are taking place in e-Governance Technologies from time to time, the Municipal Administration & Urban Development Department have reviewed the functioning of the e-Suvidha. The review has revealed gaps in availability of more solutions /Modules in the present e-Governance system. Provision is not available in the Property Tax module for a Municipality to display day-wise details of tax collected. The system does not reconcile the tax information posted by the e-Seva centers into the Municipal database. It is also not allow a citizen to make part payments which is causing a great hardship to the genuine one who is really unable to pay the total tax burden at a time. Thus, the current e-Municipal system is lacking in Real Time monitoring of Tax Payment; Efficient Integration with Mee - Seva centers; Accurate Calculation of Taxes etc., and requires to be more citizen friendly. In addition, ULBs have also requirements for integration of Municipality services with GIS System, tracking of their court cases; purification of Data etc. for their efficient and effective service delivery. New and improved solutions are needed to address the above gaps.

3. The Municipal Administration & Urban Development Department have therefore considered that Capacity up-gradation of the existing e-Municipal systems would be a solution to address these limitations. The Capacity up-gradation would bring in additional modules which

::2::

are customized Municipality wise, and also improved versions of Technologies in to the e-Governance systems. This up-gradation would enable the ULBs to cater the diversified Municipal needs of the citizens in an integrated manner, and also reduces Hardware requirements and Maintenance cost of the project.

4. keeping the above objectives in view, the Municipal Administration & Urban Development Department have prepared a Project proposal for implementing an integrated e-Municipal ERP modules in all ULBs under Swiss Challenge Approach mentioned at section 19(II) of the AP Infrastructure Development Enabling Act, 2001. The cost of the project is estimated to be approximately Rs.7.50 crores (Rupees Seven Crores and fifty Lakhs only) to be met from the available budget provision under the Head of Account of Smart Cities, 2015-16.

5. On the project proposal, Government has constituted an Appraisal Committee vide G.O.Rt.No.98, Dated: 18.2.2015 to evaluate the project proposal. The Committee headed by the Adviser IT GoAP, has examined and approved the project in its meeting held on 24.2.2015. Further, the Infrastructure Authority constituted under Section 13 of A. P Infrastructure Development Enabling Act, 2001 also approved the project proposal. Therefore, Department have issued tenders inviting bidders for the project.

6. In view of the approval of the project proposal by the Infrastructure Authority under AP Infrastructure Development Enabling Act, 2001, Government hereby accord administrative sanction to the MA&UD Department for taking up and to proceed further with the project proposal of implementation of Integrated e-Municipal ERP solution in all the ULBs under Swiss Challenge Approach detailed at section 19(II) of the Act with the estimated cost of approximately Rs.7.50 crores (Rupees Seven Crores and fifty lakhs only) and to meet the expenditure of the Project from the available budget provision under the Head of Account of Smart Cities, 2015-16. The new e-Governance e-Municipal ERP solution will supplement, support and will be in addition to the Scheme of e-Suvidha currently being implemented in the State.
